PROJECT MANAGEMENT APPLICATION FOR AN ARCHITECTURE OFFICE

To Create A Tool That Can Help Manage The Project Seamlessly

Problem Statement:

You have to create an application for one of the top Architecture design studio to help and manage their daily task. Taking daily updates from the vendors and contractors and forwarding same to senior becomes a challenge, and many times it can be seen that some important points are missed out during the translation. Using social media applications becomes a task as the lines get blurred between professional and private life. The office wanted to design an app to solve the problem of using multiple apps to get a task done and to keep a track of the projects progress.

Goal:

To create an app that can help in assigning, tracking and reminding the user with the task. Keep track of the teams progress as well as the progress done on site by the contractor.

Role:

- Research
- Concept-Ideation
- UX designing
- UI design

Content:

- Research
- UX Design process
- Low Fidelity mockups
- High Fidelity mockups
- Interactions

azure helps teams move work forward.

Collaborate, manage projects, and reach new productivity peaks. From high rises to the home office, the way your team works is unique—accomplish it all with **azure**.

azure gives you the confidence that everything's organized and accounted for, let's make progress on the things that are important to you

PLAN

Create user stories and issues, plan sprints, and distribute tasks across your team.

TRACK

Prioritize and discuss your team's work in full context with complete visibility.

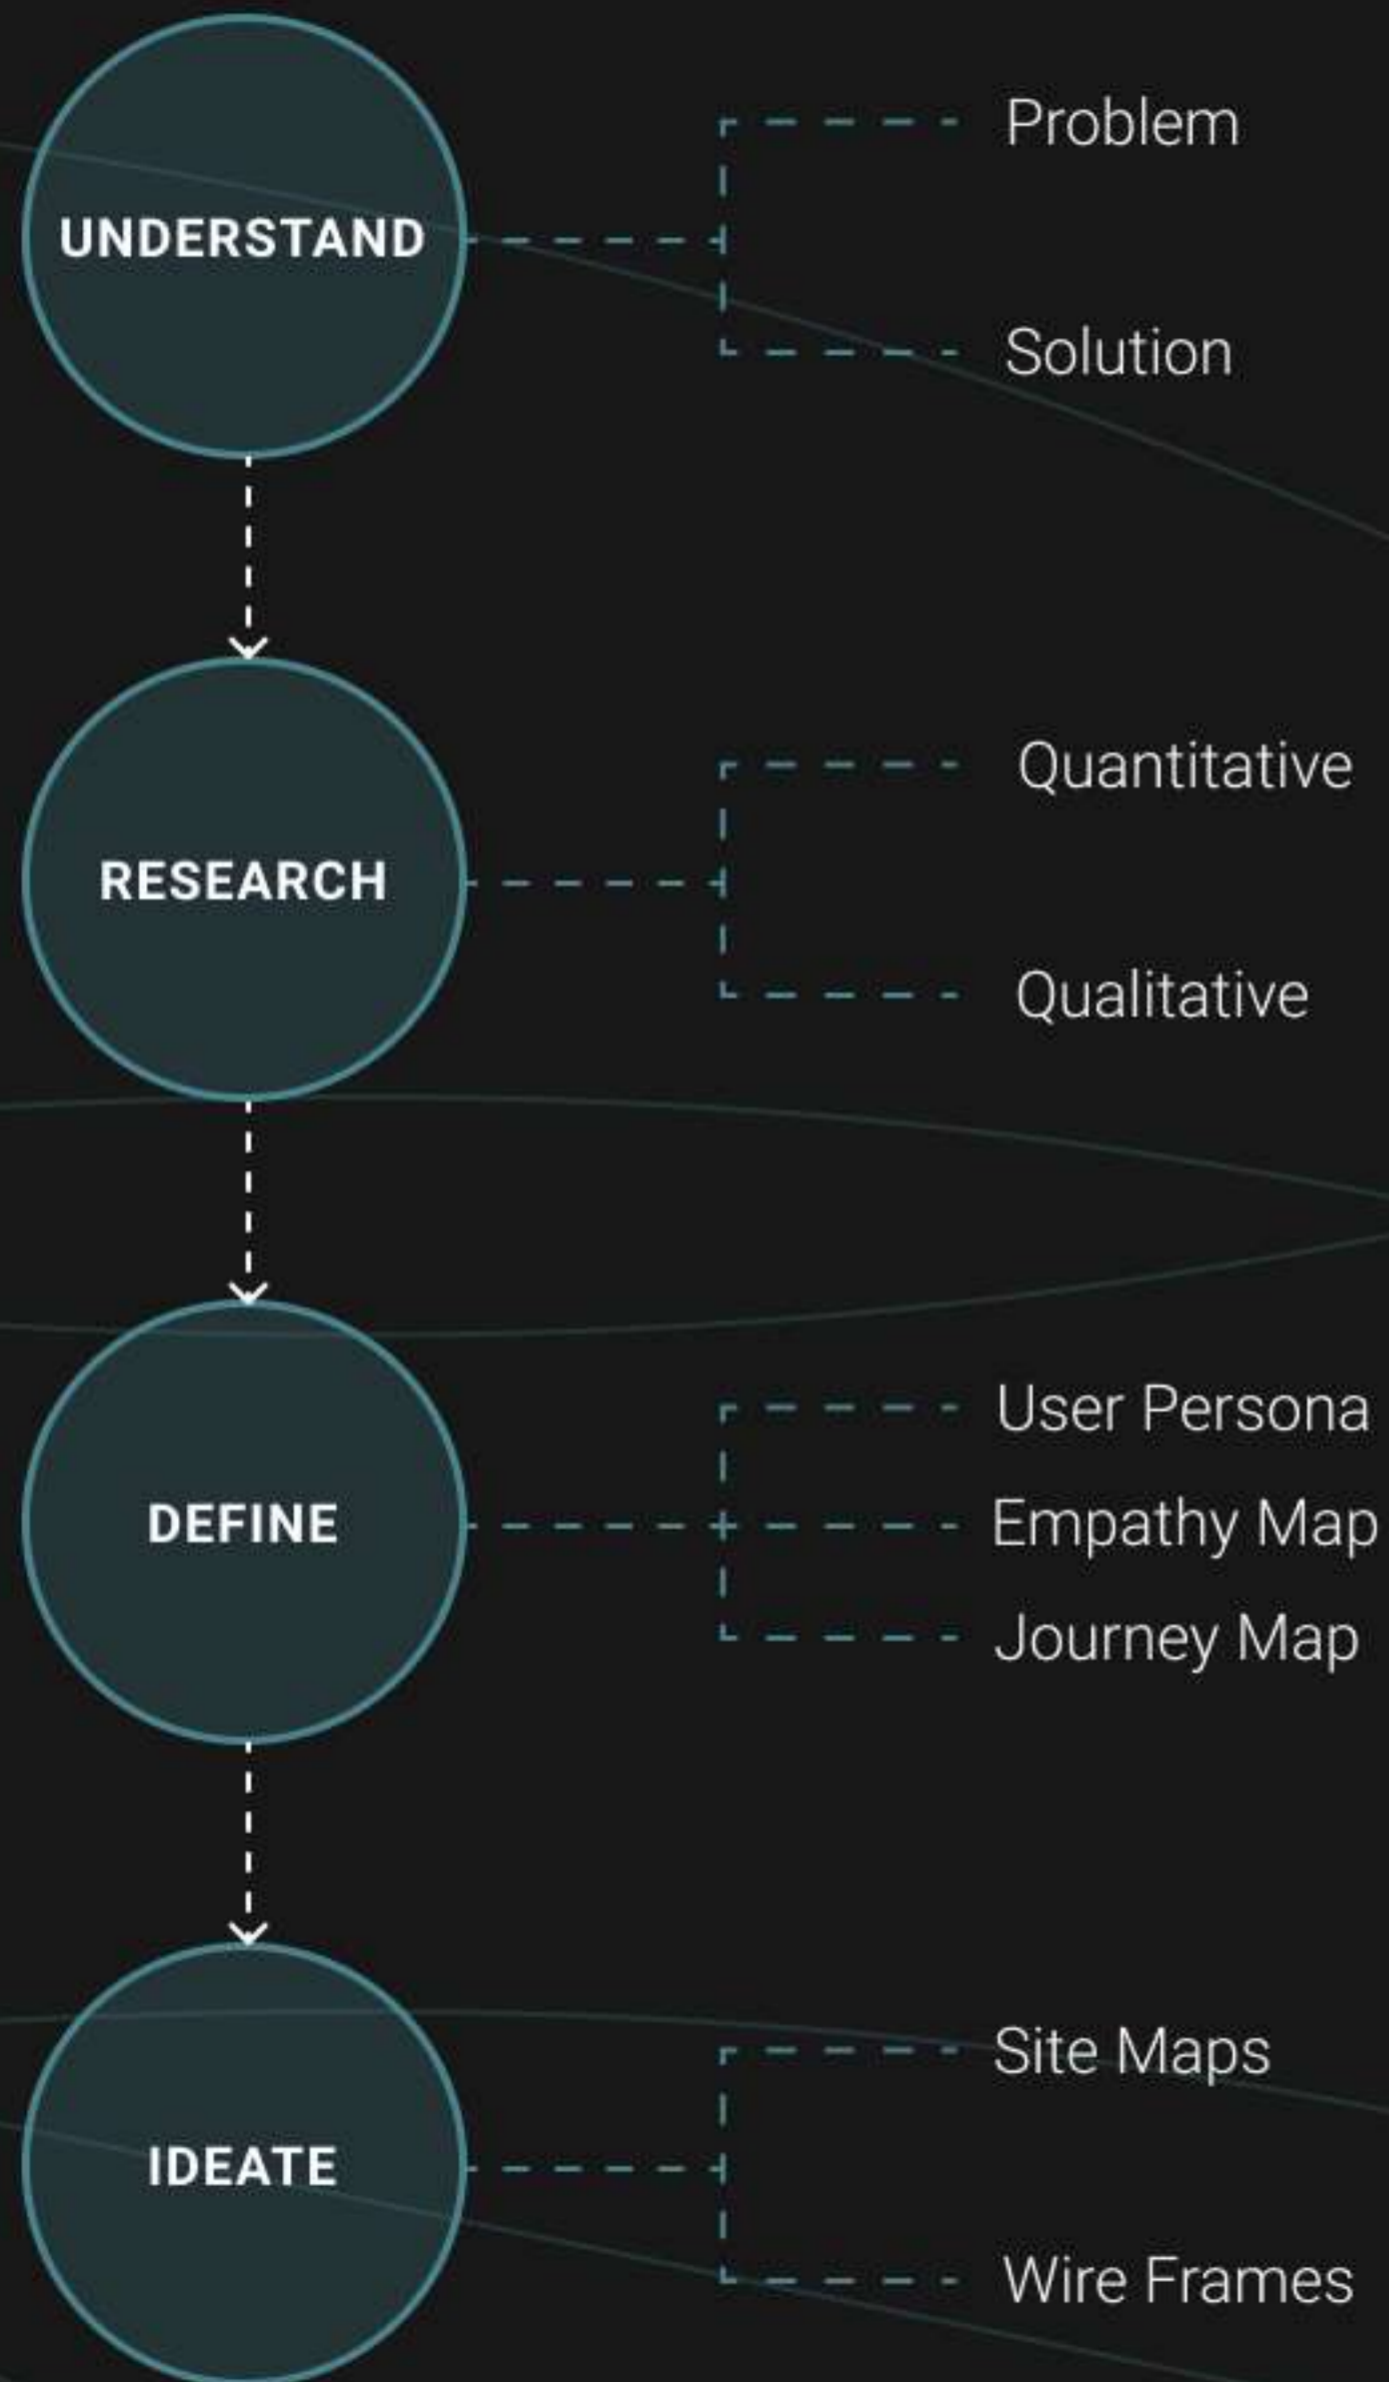

RELEASE

Ship with confidence and sanity knowing the information you have is always up-to-date.

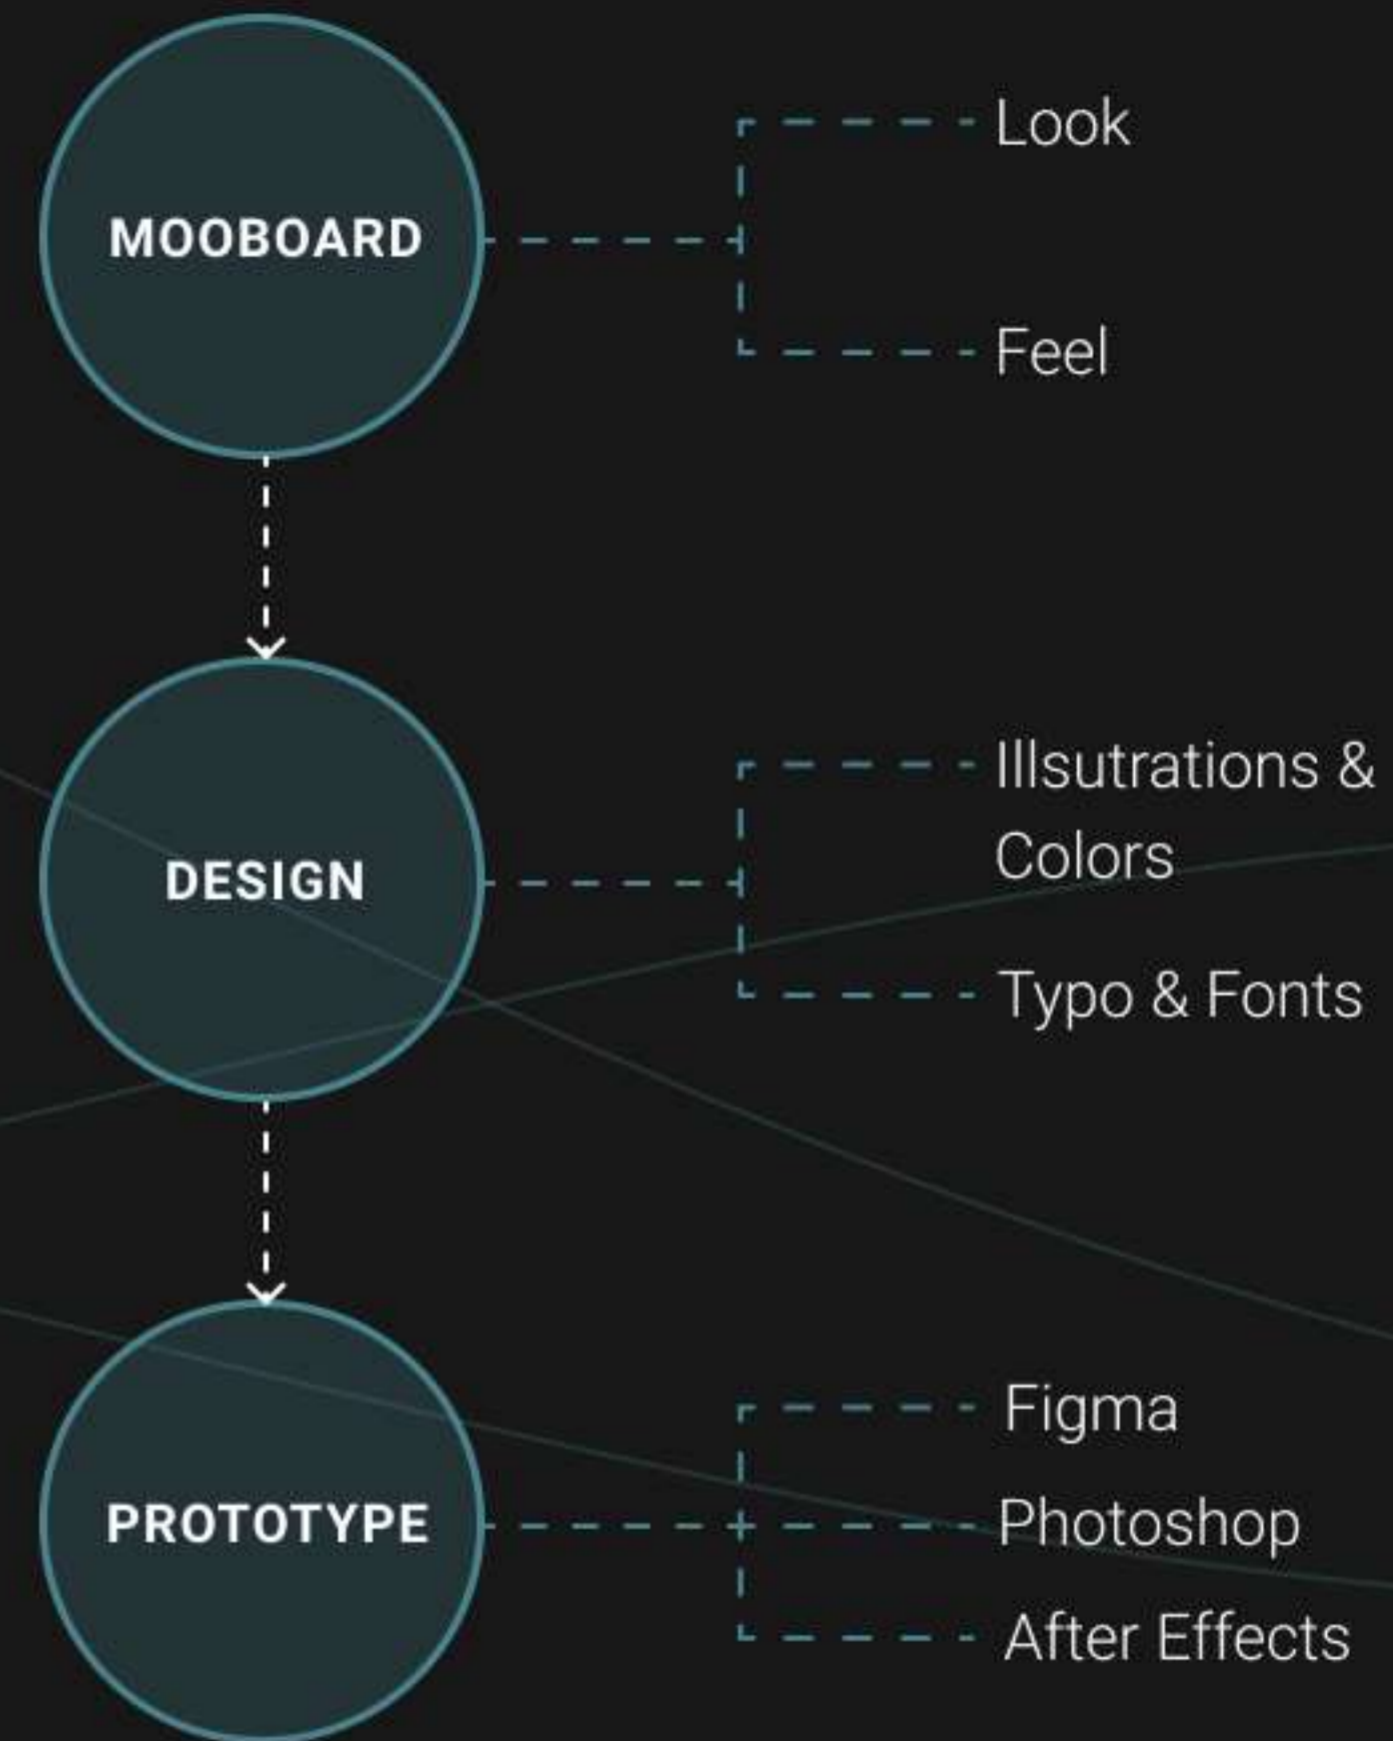

REPORT

Improve team performance based on real-time, visual data that your team can put to use.

Story

Roger is working as a contractor in the field of construction since 25 years. Innovation and use of new materials that excites him. The last project has brought him new clients and new horizon to explore.

He handles a team of 25 people, various agencies are also linked with him to complete a project. Roger is in search of managing a team and tracking the progress of the project in one place.

“ Less is more, but more is more”

Goals

Developing the company like a well oiled machine.

Explore new materials and construction techniques.

To achieve the seamless collaboration with the team and all the project members.

Exploring new fresh ways and techniques to manage team and projects.

Needs

Seamless collaboration with the team and all the project members.

Organize convenient and efficient work environment for the team.

Define collaboration and co-ordination in a visual manner.

Define the task and track the progress of the project in realtime.

Wants

Easier and more accurate progress tracking.

Easier way to communicate and assign task.

Less co-ordination work.

Assign reminders for upcoming task.

Fears

Lots of projects have lot of data, it gets difficult to organise.

Wrong or unapproved material goes to clients and stakeholders by mistake.

Keeping up to date with new digital tools, moving files to new programs.

Work gets assigned to the wrong team or the delegation gets lost in transition.

Thinks

To balance personal & professional life.

An easier way to communicate and assign task

An app that can help me co-ordinate and manage team in one place.

To manage client more efficiently and save time in co-ordination and update.

Feels

Efficient when things are organised and planned.

Sense of accomplishment as task gets completed.

Frustrated when things are not in place or deadlines are missed.

Time is of the essence in every project.

Says

Remembering details of every project is a task.

Wants to see all the assigned tasks to various projects in one place

Wants an app to categorize the project details

Need an app that can help in tracking the progress of the project

Does

Notes down tasks to be assigned to the team members

Calls is a way to know the site progress of project in regions out of his own city

Regular updates to the principal architect in person

Updates to the client every week regarding the progress report.

Pain

Busy Schedule

Fear of missing out on deliverables

Multiple apps lead to confusion

Need an app that can help in tracking the progress of the project

Gain

Organised tasks and deliverables.

One app to manage all the projects.

Saves time and effort for co-ordination and tracking updates.

Thinks

To balance personal & professional life.

An easier way to communicate and assign task

An app that can help me co-ordinate and manage team in one place.

To manage client more efficiently and save time in co-ordination and update.

Feels

Efficient when things are organised and planned.

Sense of accomplishment as project get completed and bills are cleared.

Frustrated when things are not in place or deadlines are missed.

Time is of the essences in every project.

Says

Memorising details of every project is task.

Wants to see a all the upcoming tasks in one place with an alert system for deadline.

Want an app to categories the project as per deliverables.

Need an app that can help in tracking the progress of the project.

Does

Check the list of materials delivered on site

Calls are the only way to know the site progress of project in regions out of his own city

Regular update from the site supervisors and juniors regarding the prohect

Updates to the client every week regarding the progress report.

Pain

Busy Schedule

Fear of missing out on deliverables and mixing up projects

Send wrong materials to the wrong locatic

Need an app that can help in tracking the progress of the project

Gain

Oragnised task and deliverables.

One app to manage all the projects from various clients.

Saves time and efforts for co-ordination and tracking updates.

Architect's Journey Map:

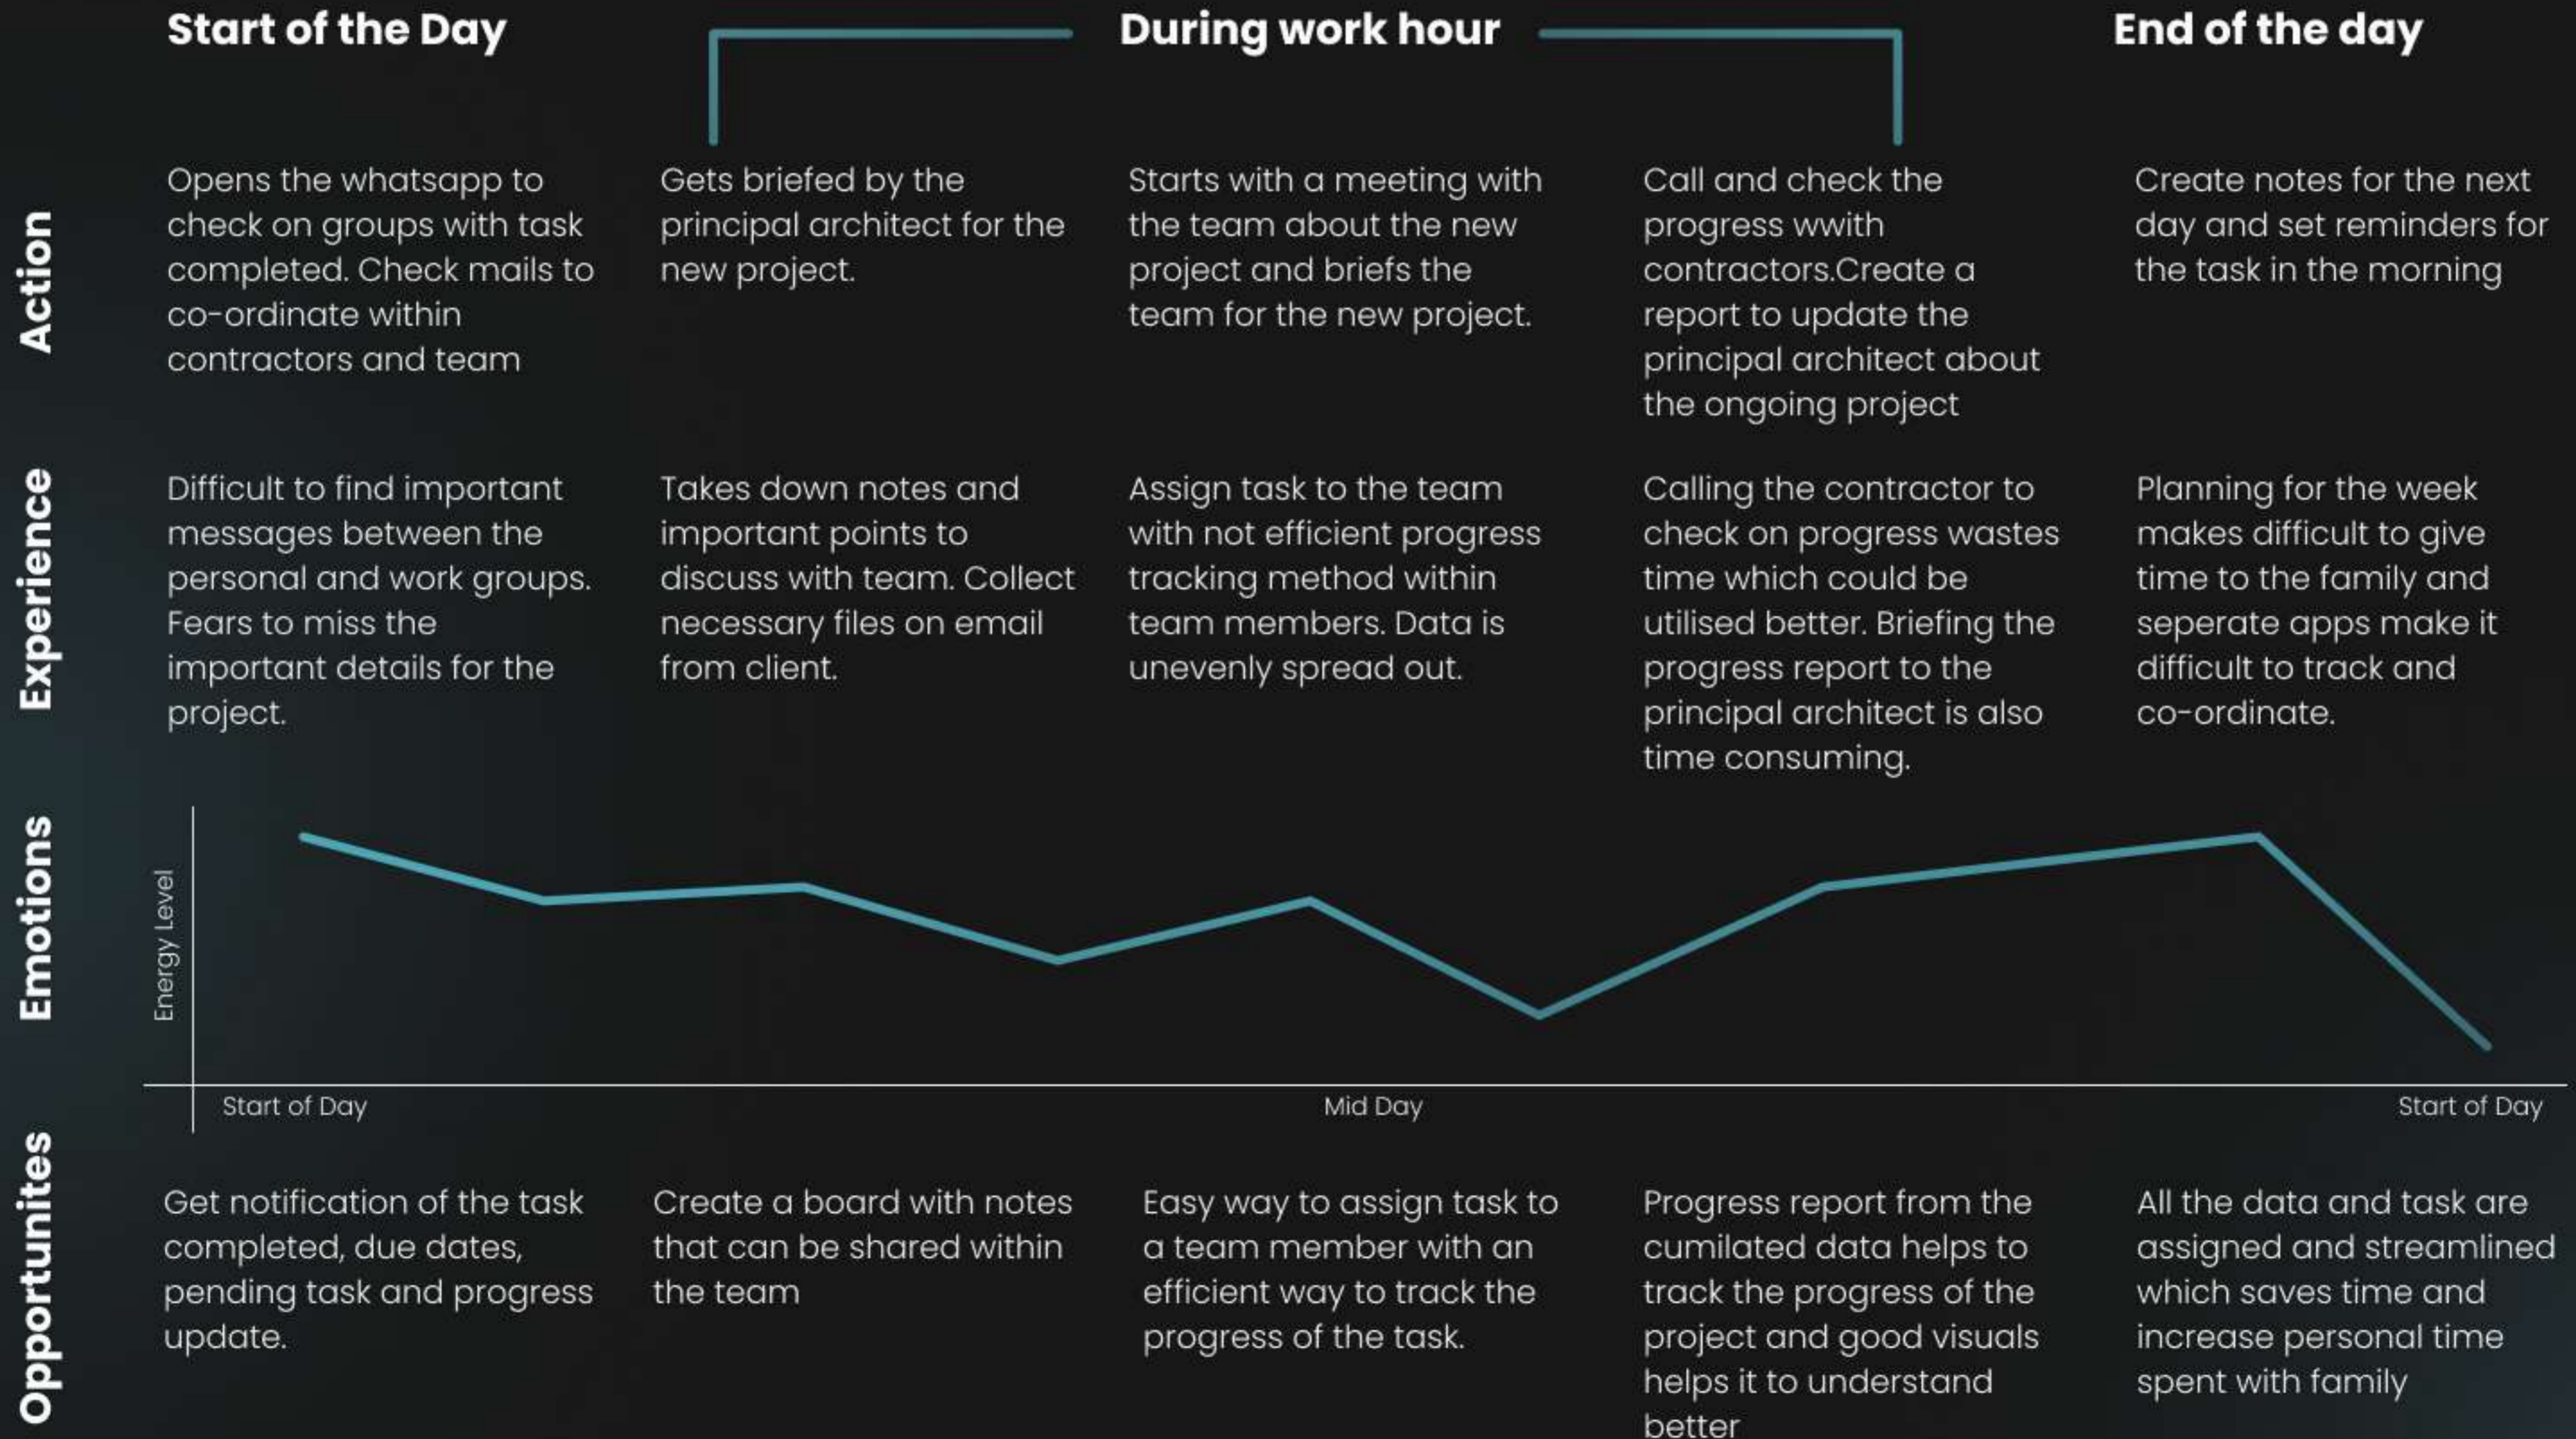

Scenario

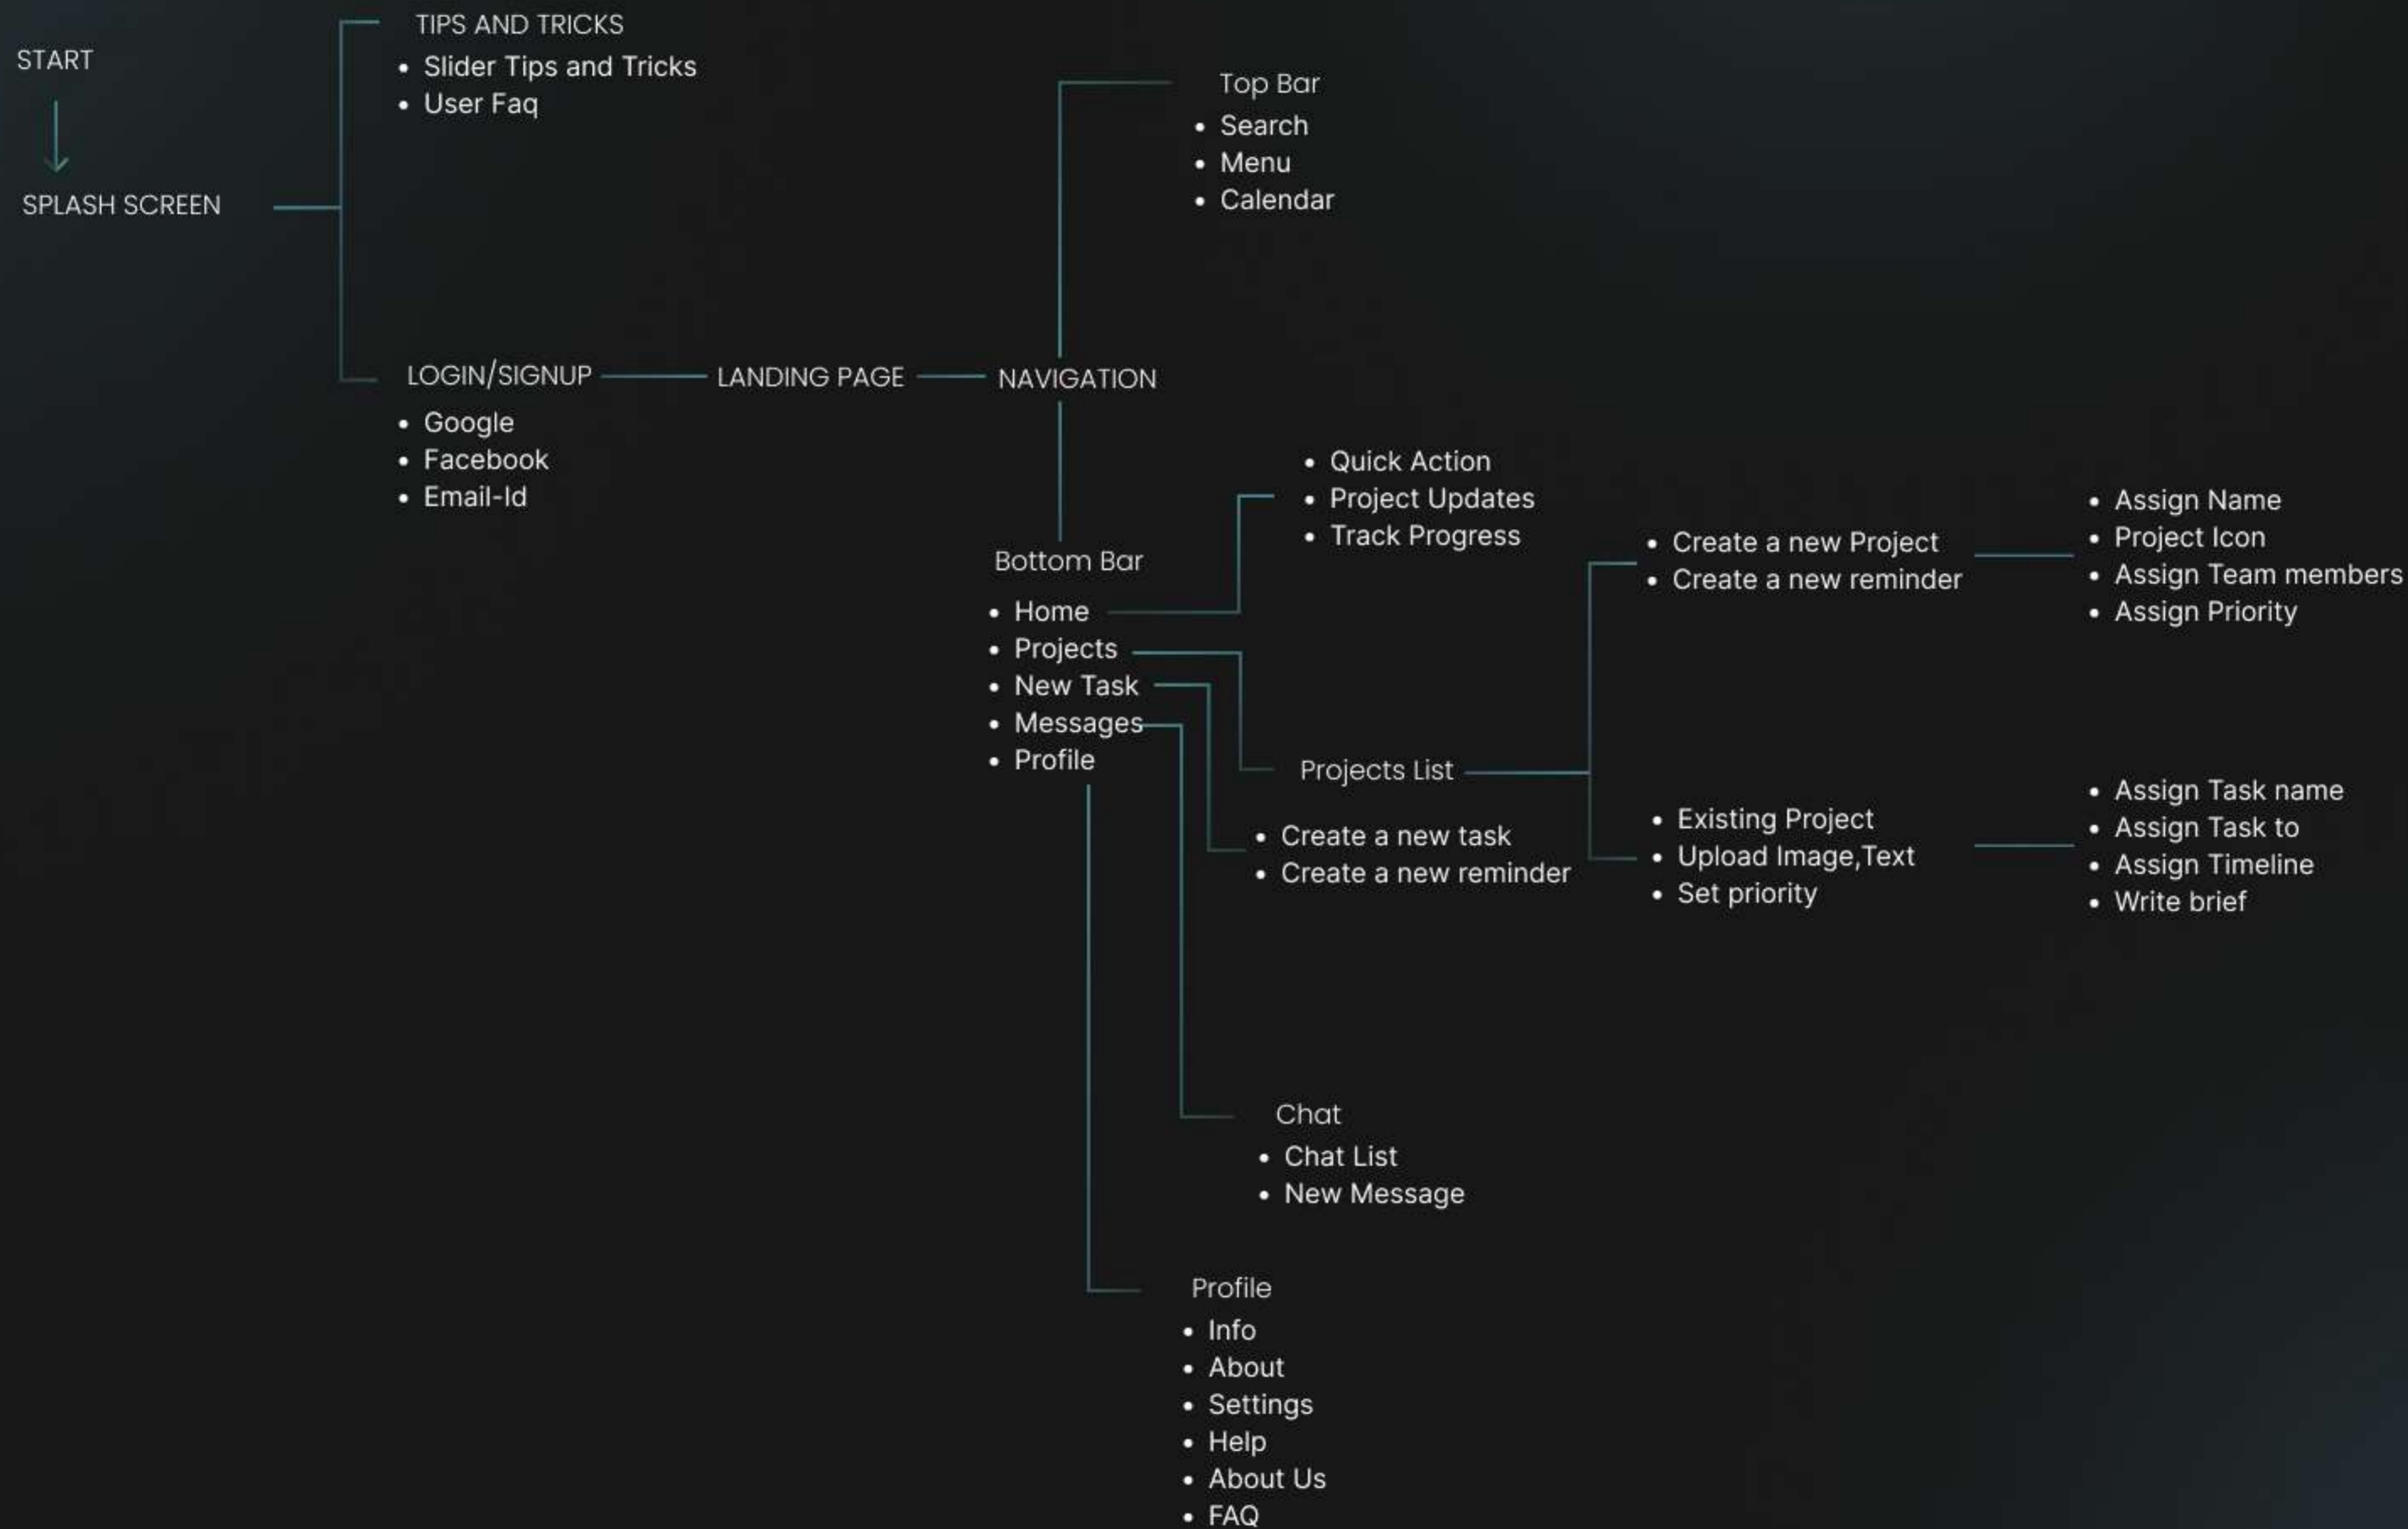

A new project is assigned with all the team members are inducted in the team. Task are to be assigned with deliverable dates. Making a board with the team members and contractor for the new assigned project and delegating task and timeline.

Expectation

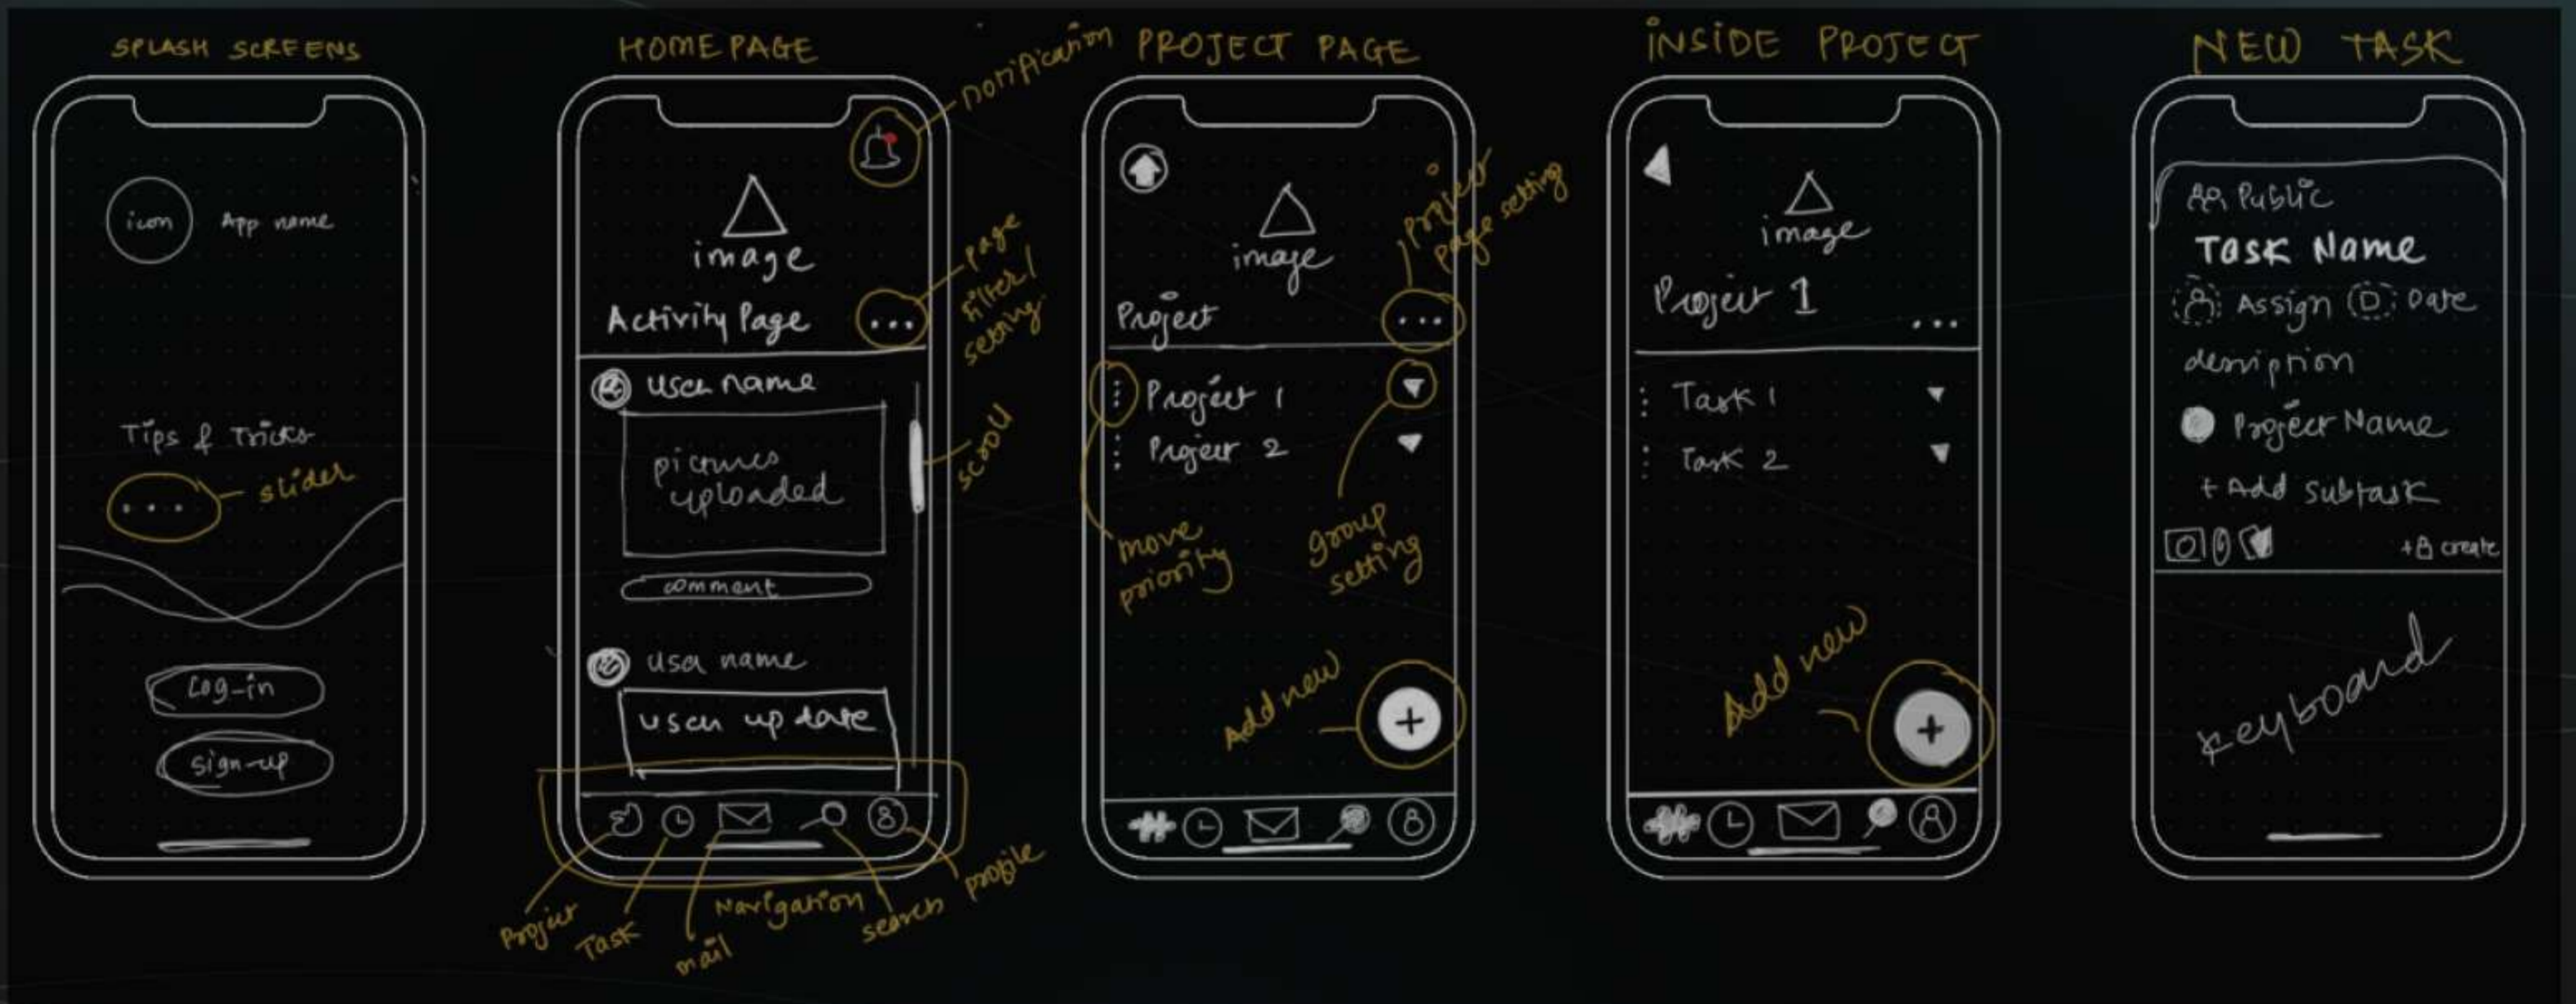

Ease of assign task to the team members with timelines for the deliverables. Co-ordination with the contractor for the site development with a timeline sync with deliverable dates. Tracking the progress of project. Saving time in co-ordination and coloboration.

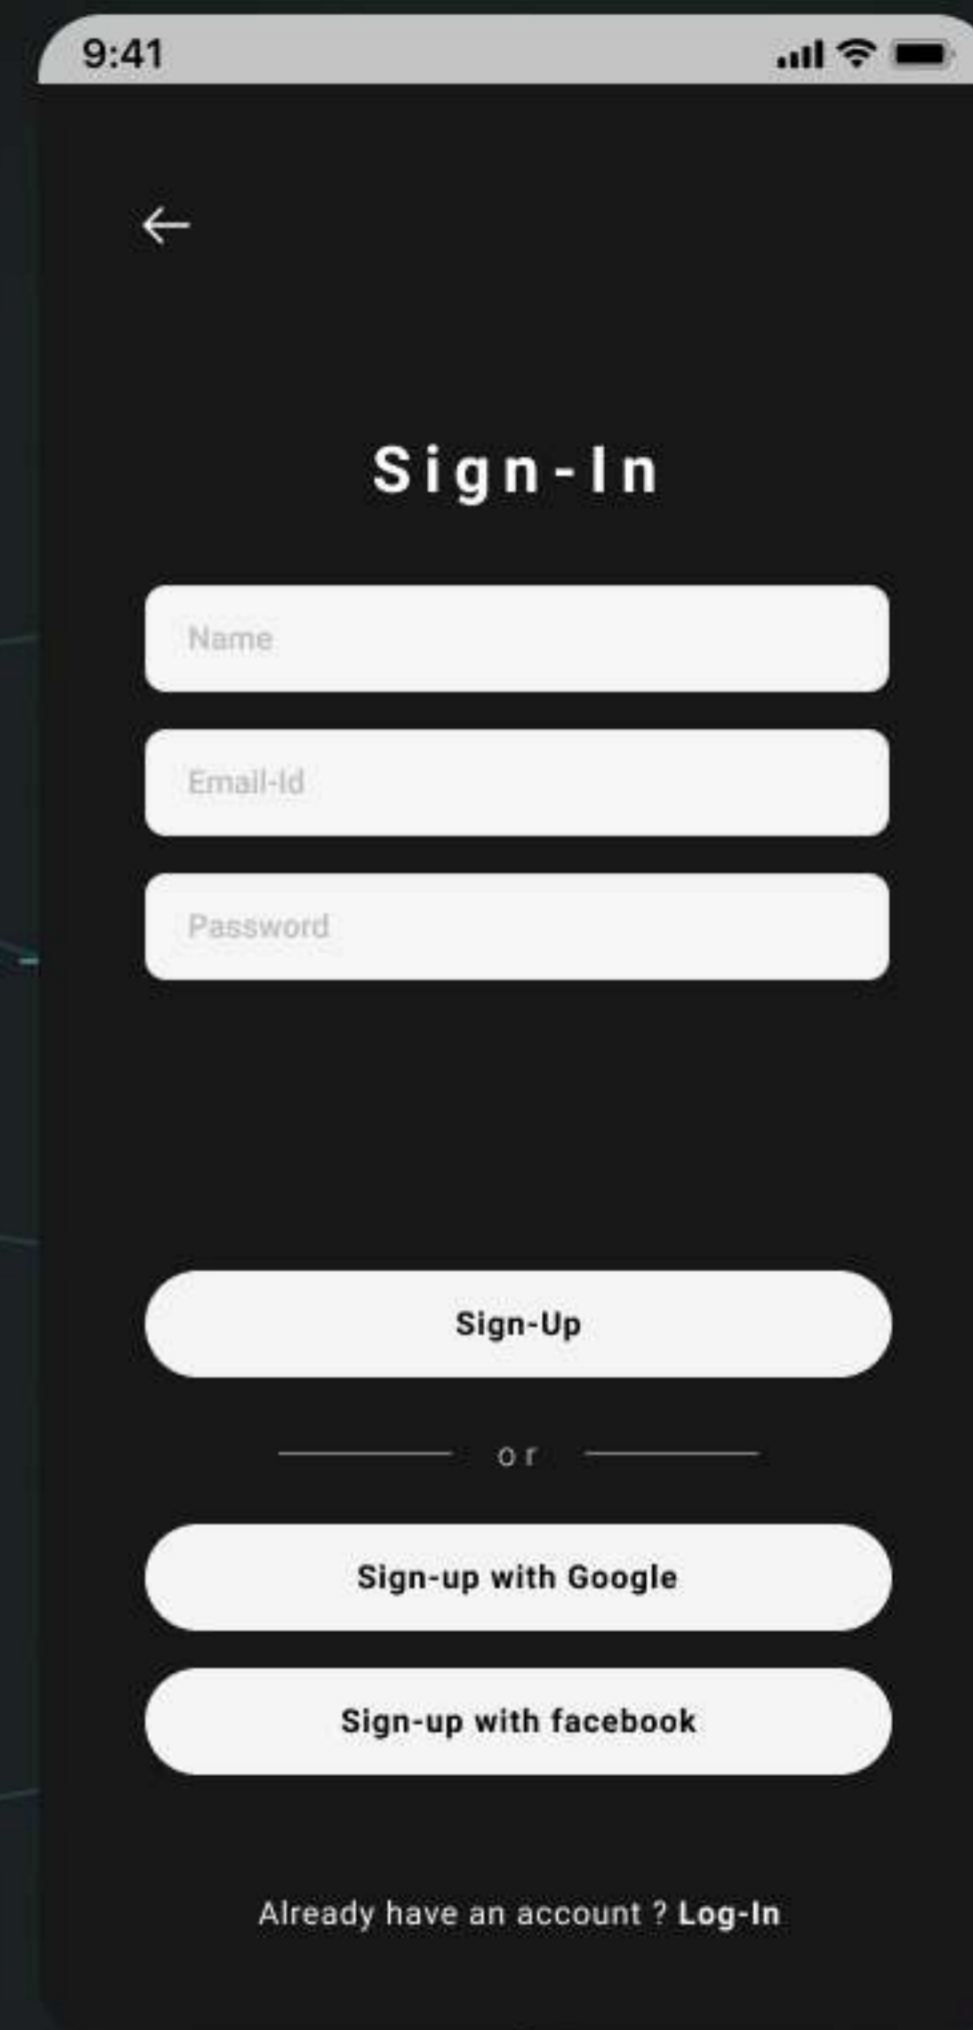

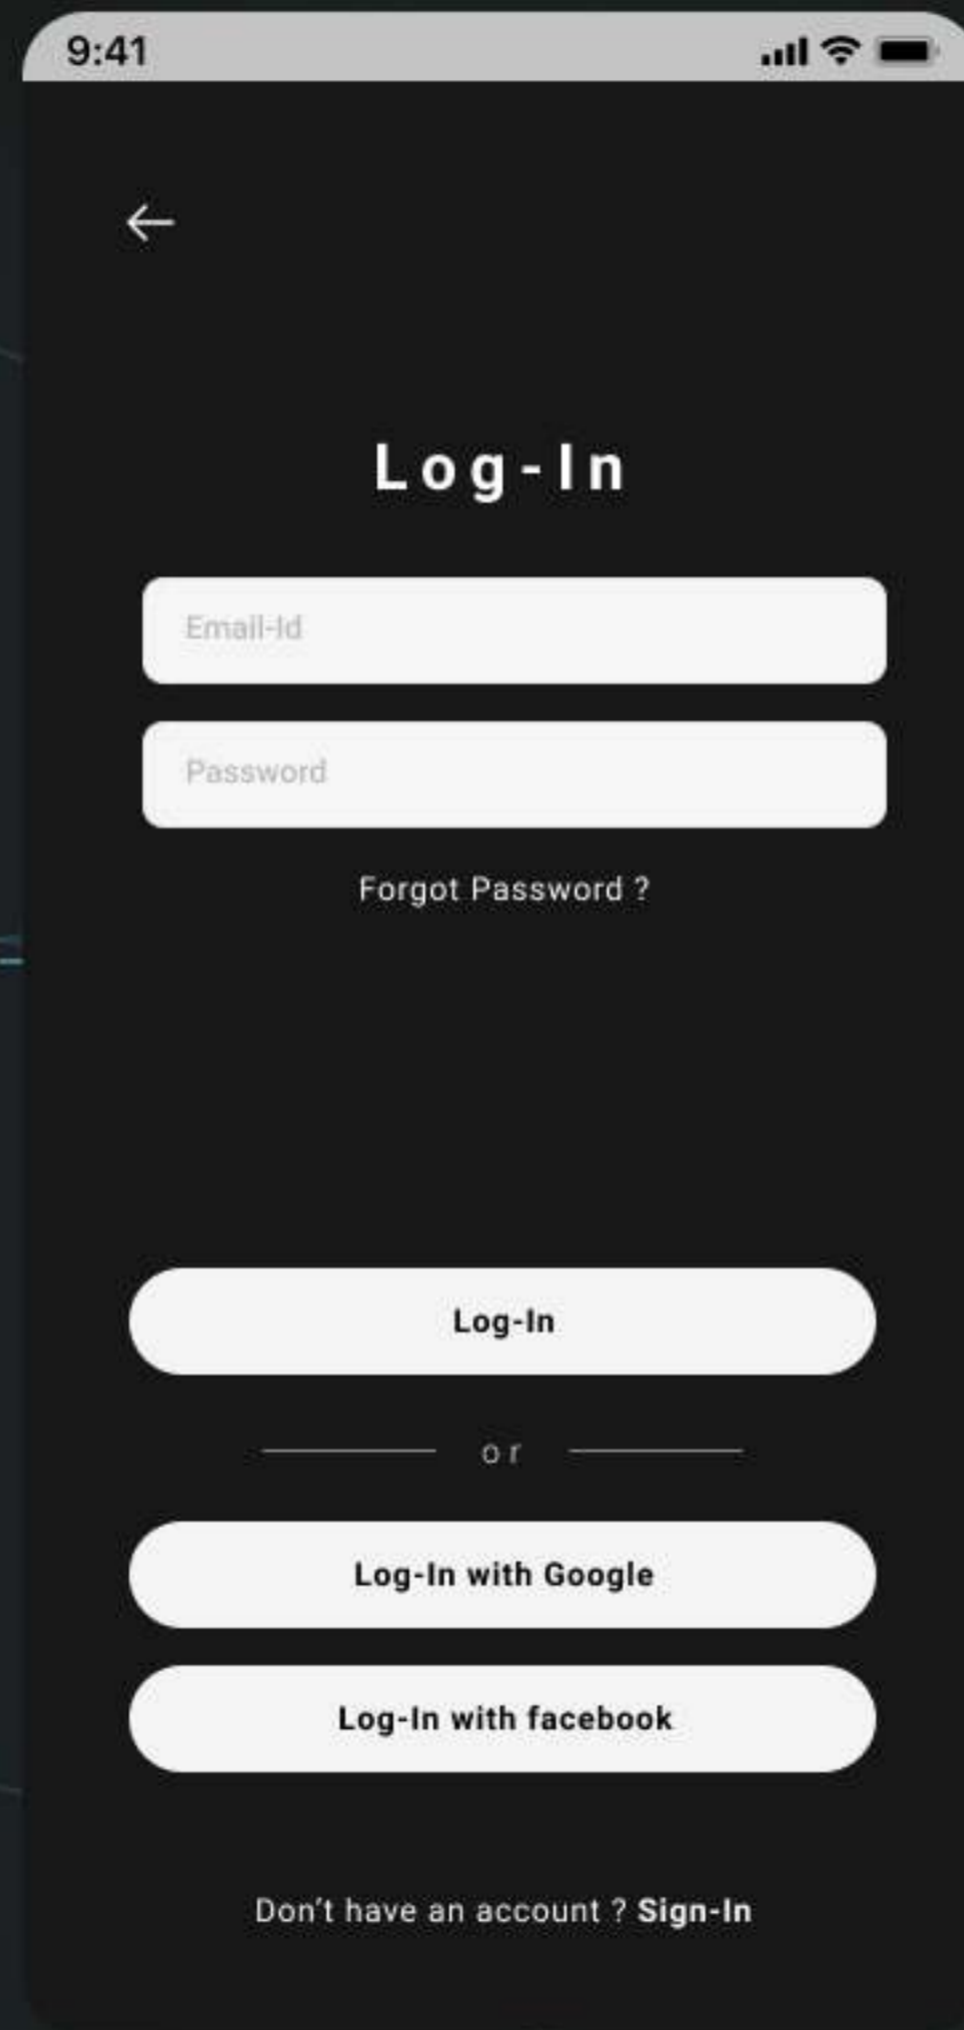

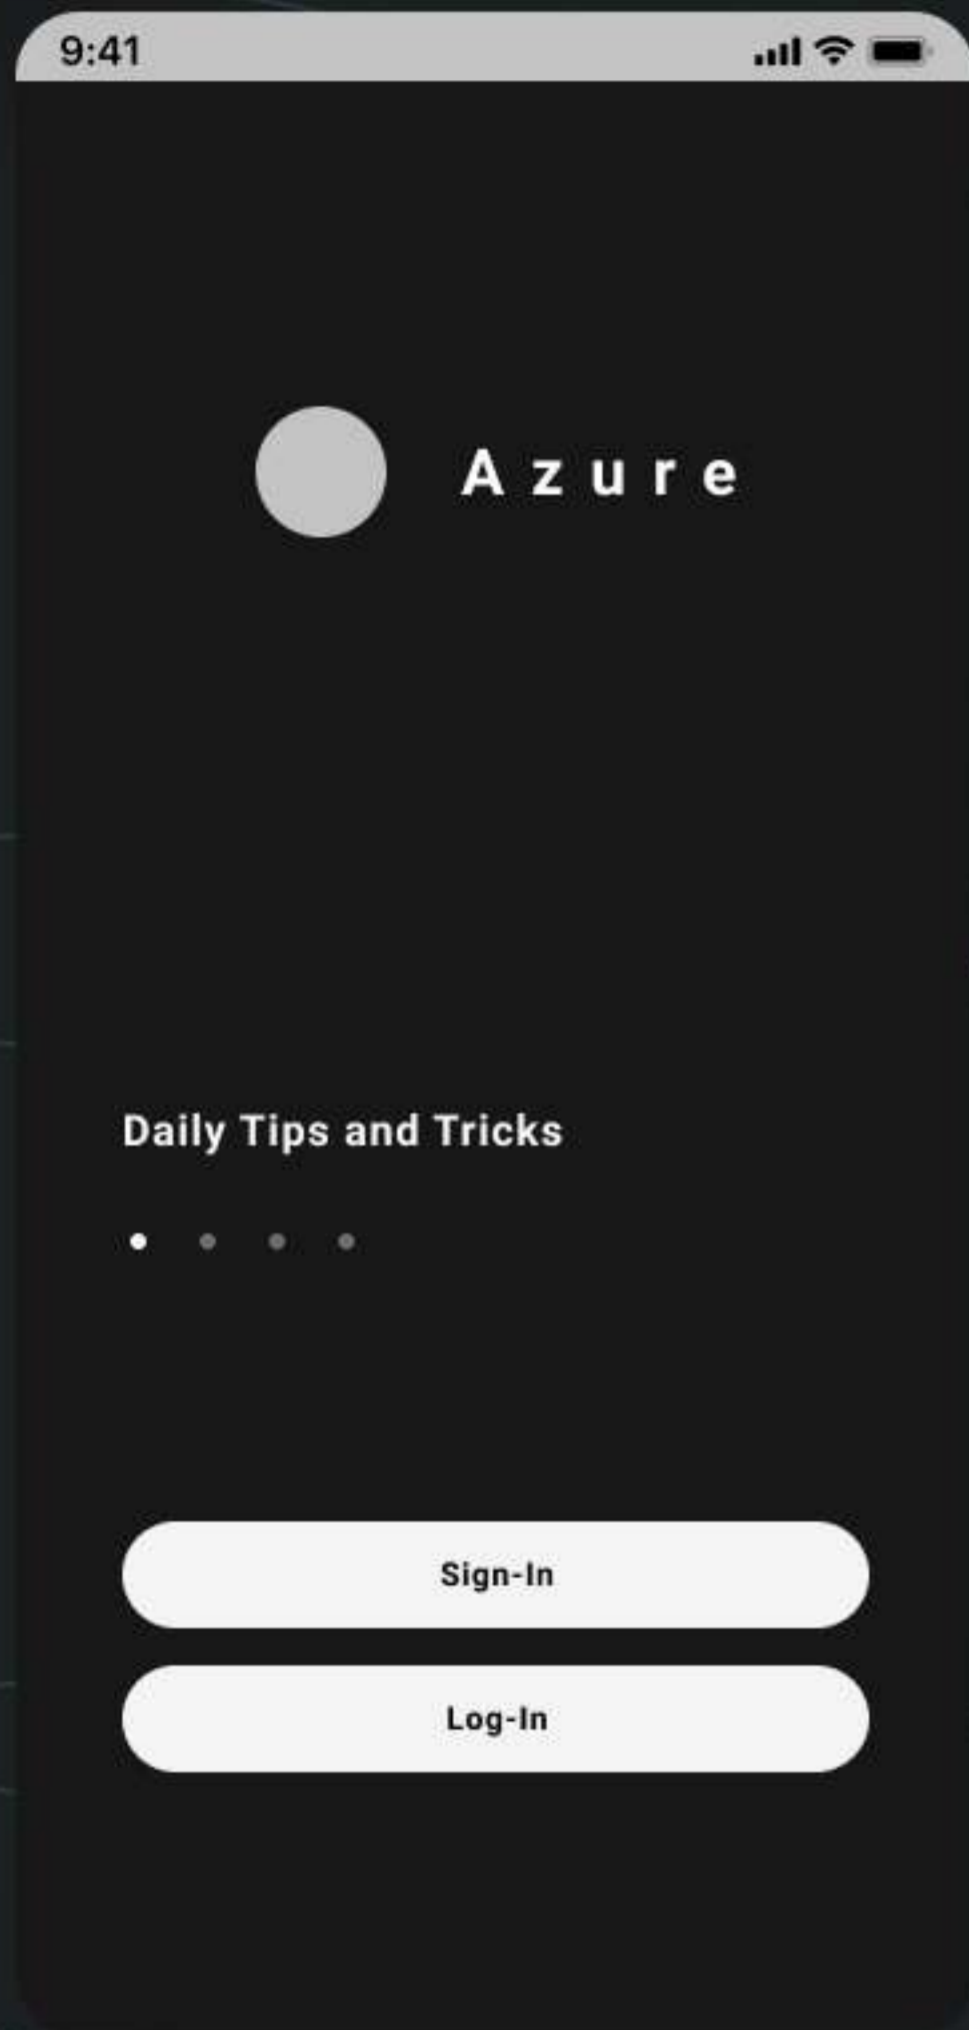

A day in an Architects life

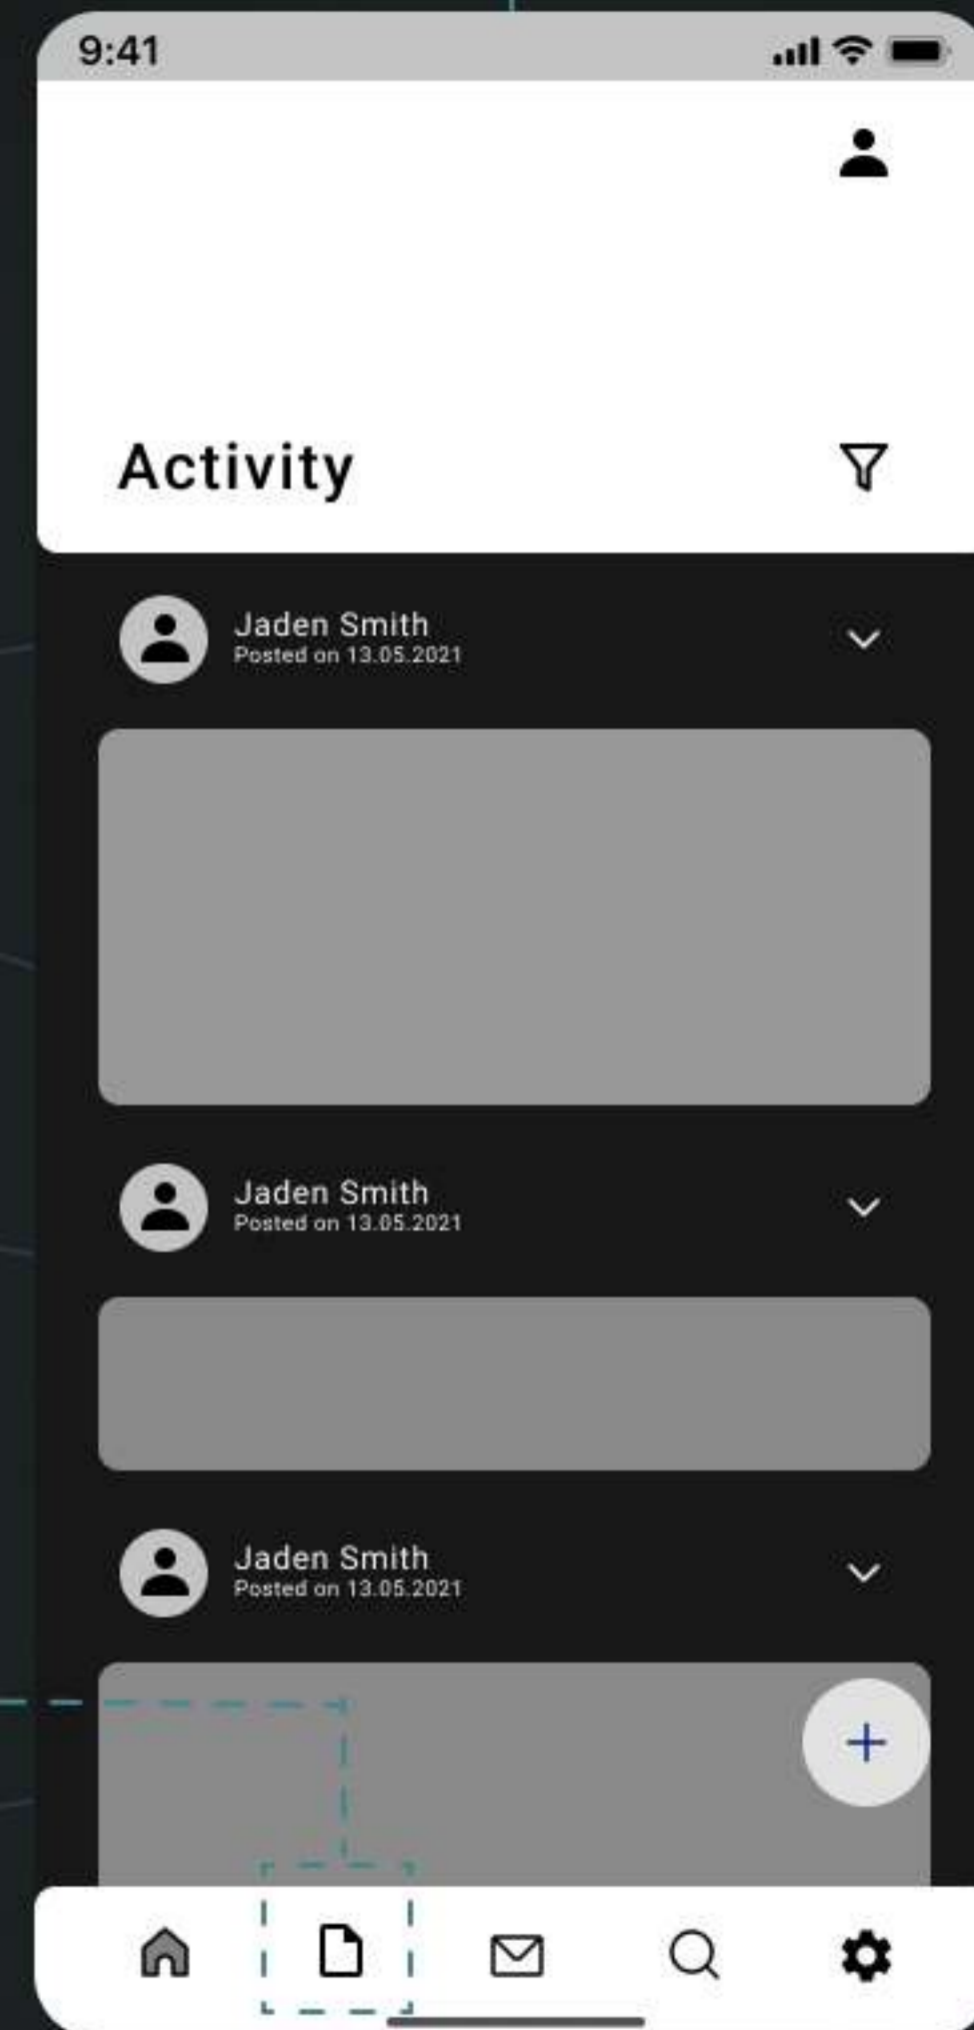

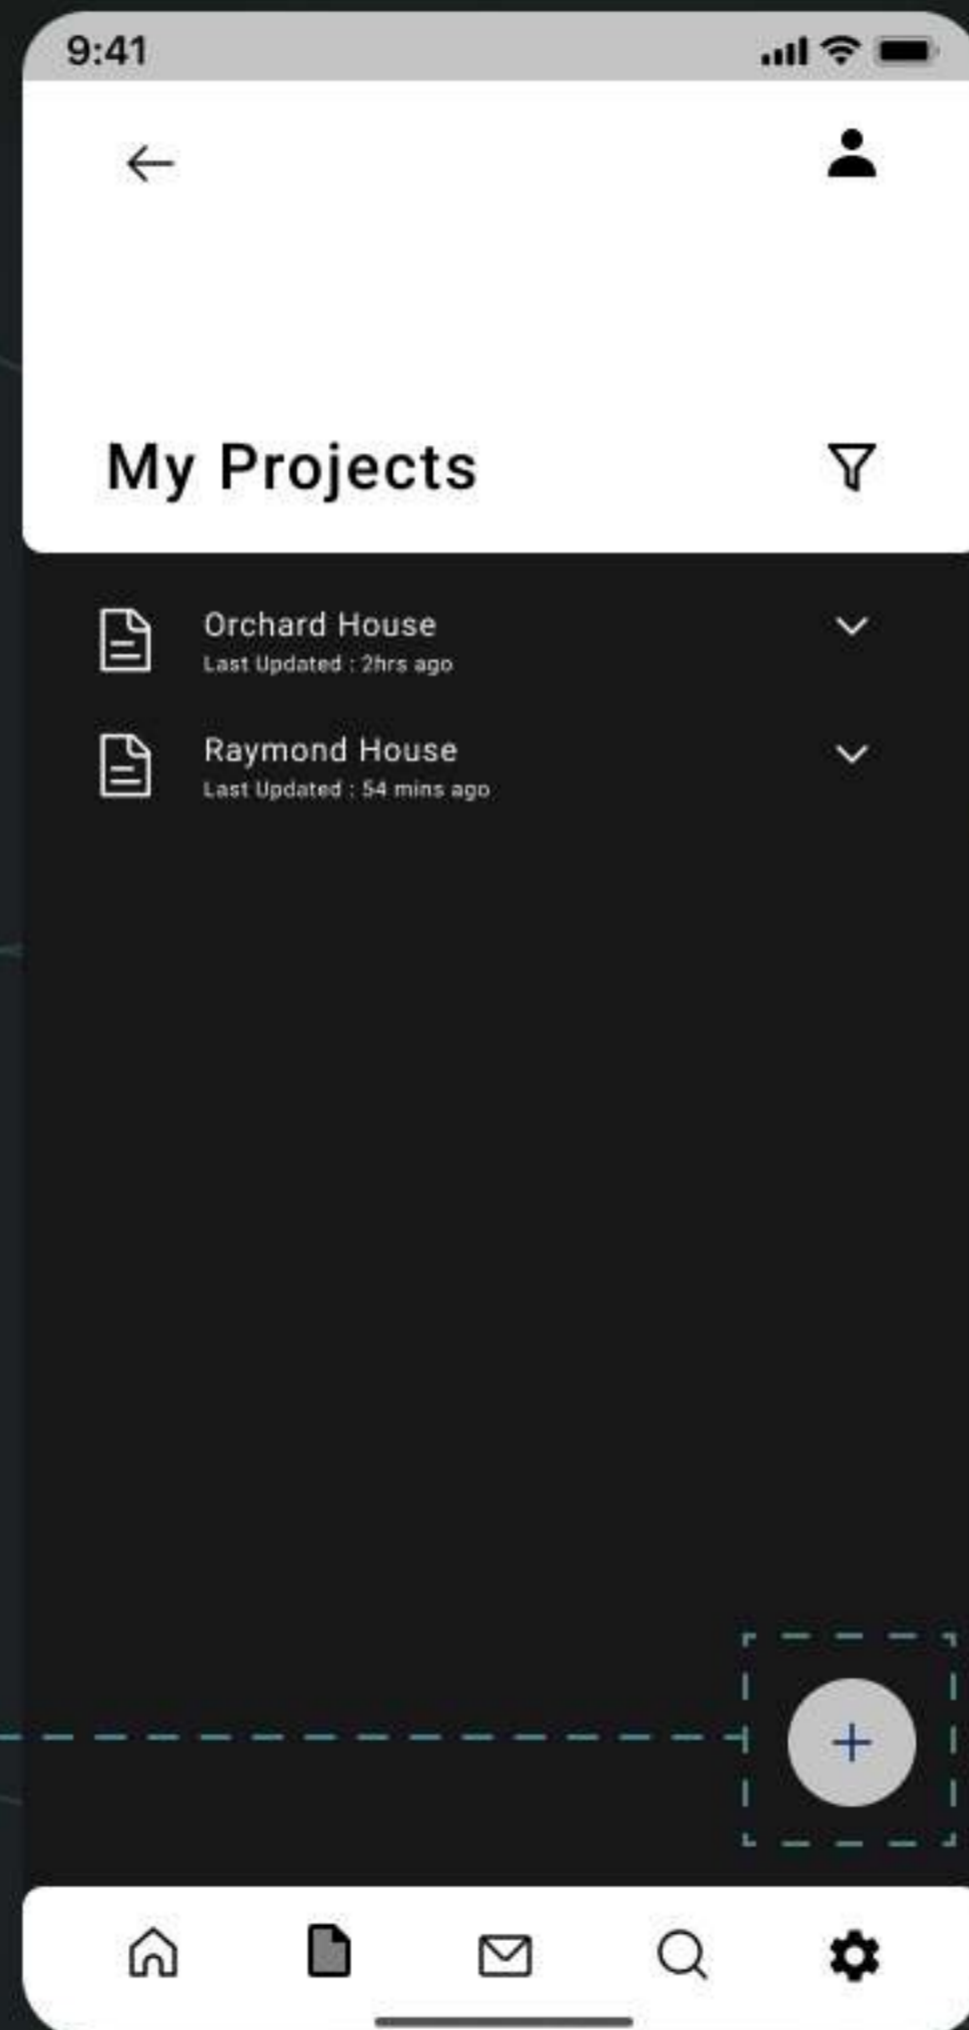

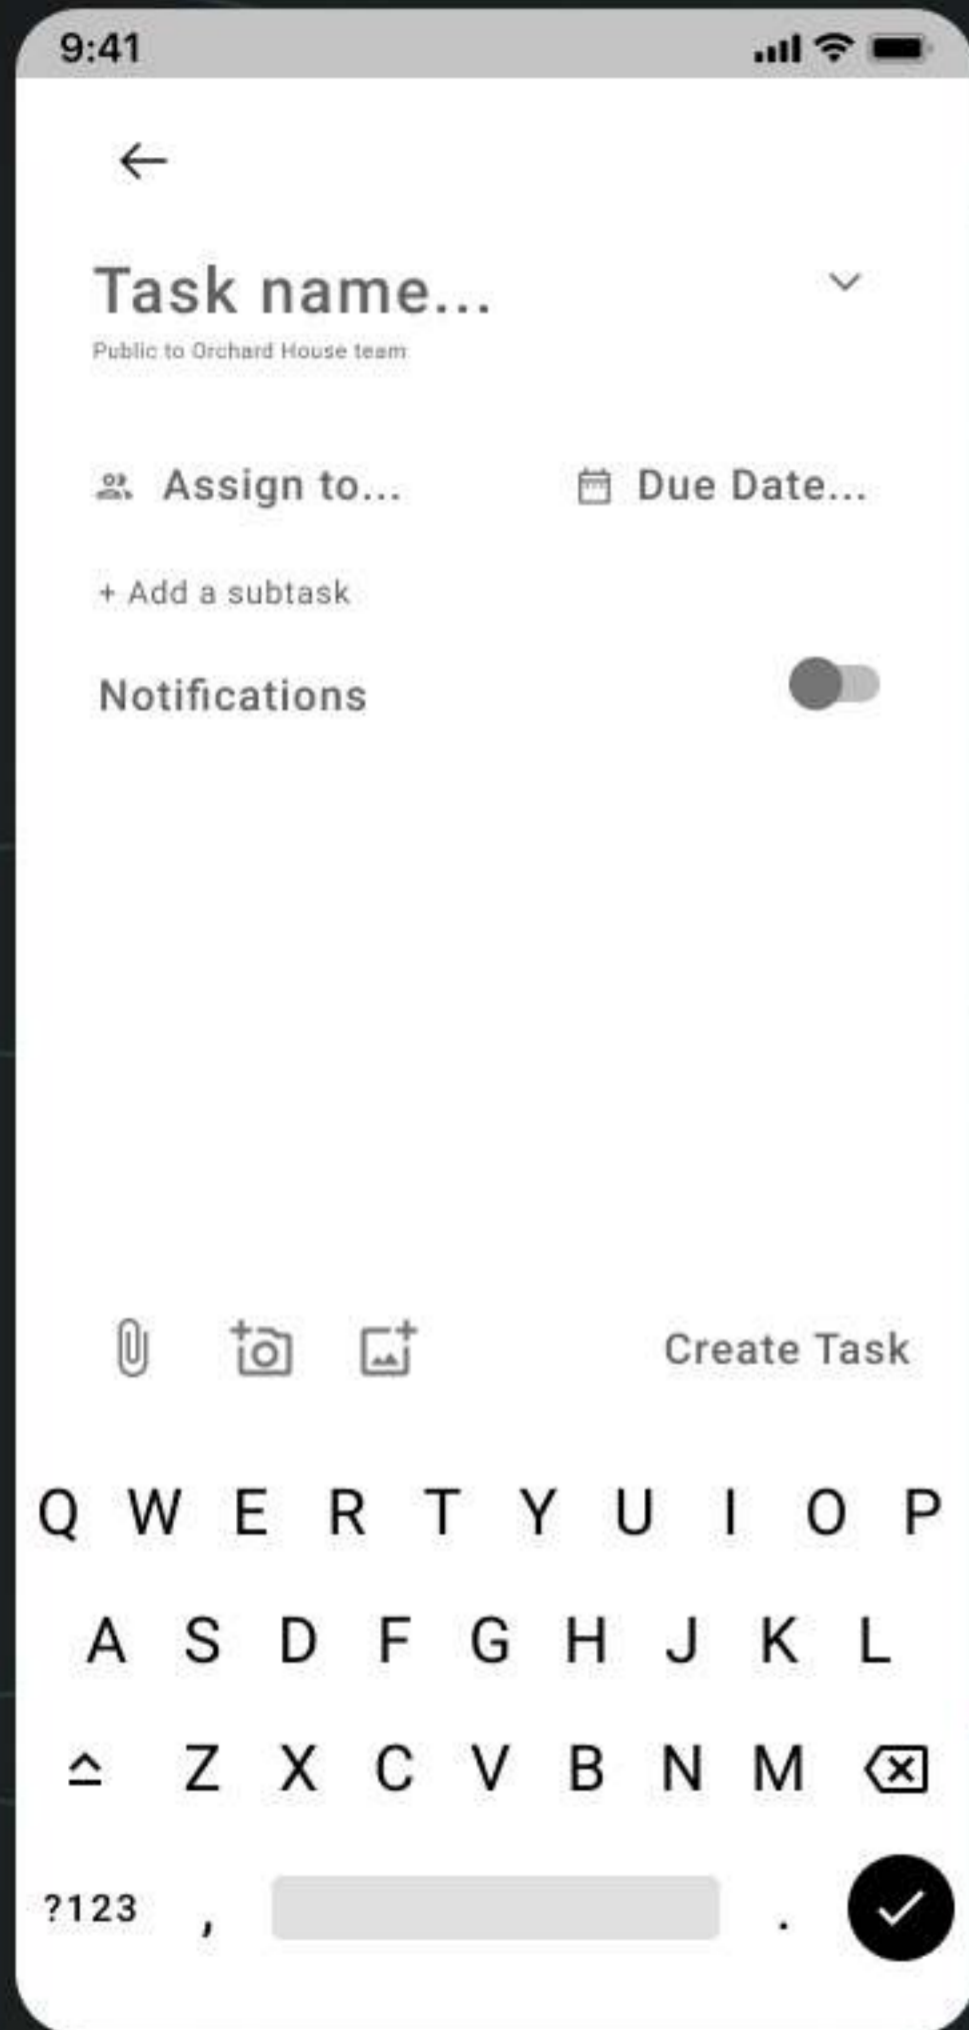

Some initial brain storming sessions and rough sketched to build upon the pages. Building a seamless flow and using the homescreen real estate for better optimisation was the thought behind the low fidelity sketches.
